Sharp Reinvents the Microwave Oven for Today's Kitchen Designs

Most every homeowner wants a stylish new kitchen complete with a center island and lots of open space. But this major design trend provides fewer options for where to place the most frequently used appliance of all – the microwave oven. Fortunately Sharp has developed the Insight Pro® Microwave Drawer® solution. This clever design takes the microwave off the counter and places it at a perfect height for superb accessibility. It's Sharp's best idea yet for where to place the microwave.

A Microwave Drawer appliance may be a new concept, but your clients will immediately appreciate its benefits. There's no need to bend under the counter or stretch over the range to access this microwave. With just a gentle pull on the handle, the drawer opens automatically; with a gentle push, it closes. The convenient top access allows checking or stirring food without removing the dish from the microwave. Front-mounted, angled controls are easy to see, easy to use and easy to clean. Performance is another plus, with 1000 Watts of power, sensor technology that eliminates guesswork, and a spacious interior that accommodates a 9"x13" dish or a fully popped bag of popcorn.

Sharp's complete line of Microwave Drawer solutions offers flexibility for designing a new kitchen, remodeling an older kitchen or simply replacing a current microwave.
